Continuation of Disposition of Claims: Claims rejected are 4-6,8-13,55,56,58,60-66,68-73,115,116,118,120-122,126-128,130-135,177,178,180 and 182-184.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 2nd, 2007 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 4-6, 8-13, 55-56, 58, 60-66, 68-73, 115-116, 118, 120-122, 126-128, 130-135, 177-178, 180, and 182-184 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 4-6, 8-13, 55-56, 58, 60-66, 68-73, 115-116, 118, 120-122, 126-128, 130-135, 177-178, 180, and 182-184 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsuei (U.S. Patent No. 6,654,779).

5. As per claim 4, Tsuei teaches a method for providing an electronic change of address service from an old address of a customer to a new address of the customer, comprising: providing a user interface at a change of address server for the customer to enter change of address information; receiving the change of address information at the change of address server via a network; creating a first change of address record at the change of address server representing the change of address information; validating an identity of the customer at the change of address server; electronically transferring the first change of address record to a service center when the identity is valid, creating a second change of address record at the service center by modifying the first change of address record received from the change of address server; forwarding the second change of address record electronically from the service center to a forwarding service unit corresponding to the old address of the customer at least one of the sub-services within the change of address service, and processing, by the forwarding service unit, the second change of address record received from the service center electronically to automatically redirect mail addressed to the old address of the customer to the new address of the customer (*see col. 3 lines 1-65, 5 lines 10-54, 6 lines 6-7 line 52*).

6. As per claims 5-20, 55-80, 115-122, 126-142 and 177-184, they do not further limit the inventive concept disclose in claim 4. Moreover their limitations are clearly taught in Tsuei's disclosure. Therefore they are rejected under rationale as claim 4.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see form 892*).
